# ADDENDUM TO CHOLESKY-LIKE FACTORIZATIONS OF SKEW-SYMMETRIC MATRICES

PETER BENNER[*], RALPH BYERS[†], HEIKE FASSBENDER[‡], VOLKER MEHRMANN[§], AND DAVID WATKINS [¶]

We have learned that Bunch [1] studied stable decompositions of skew-symmetric matrices some twenty years ago. As it turns out, our Cholesky-like decomposition $B = R^T J R$ is essentially the same as the decomposition proposed by Bunch.
