

Prof. Dr. Karl Inderfurth

Announcement for Summer Semester 2008

Graduate Seminar on Bullwhip Effect and Supply Chain Coordination

Course Description

This graduate seminar will address two practically as well as scientifically challenging problem areas in Supply Chain Management, namely the so-called Bullwhip Effect and aspects of Supply Chain Coordination.

Students will be assigned to topics, and each must deliver an independently written seminar paper and present the material to the seminar participants.

For each topic one or two research papers from literature serve as basis for the respective seminar paper. Additional literature is expected to be included.

Prerequisites

- Basis knowledge in Supply Chain Management
- Basic knowledge in Probability Theory and Inventory Control

Schedule

The seminar meetings are blocked in the week of May 19-23, 2008. A detailed schedule will be announced later.
