~~schwach ansteigend~~  
~~= + 12/50 = + 0,24~~

~~stark fallend~~  
~~= - 12/10 = - 1,2~~

\* Der Anstieg ist definiert als das Verhältnis von Ordinatenschnitt/Abszissenabschnitt, in diesem Fall =  $\frac{12}{50}$  bzw. =  $\frac{12}{10}$ .
