

## Instructions to Authors

The Austrian Journal of Mycology will publish original papers on systematics, phylogeny, morphology, anatomy, ecology, and distribution of fungi (including lichens). Papers should be sent to the Editor: Dr I. KRISAI-GREILHUBER, Rennweg 14, A-1030 Wien, Austria. The manuscripts will be reviewed by the redaction and additional referees. Email: irmgard.greilhuber@univie.ac.at.

Manuscripts may be written in English, German, or French. They will be published in chronological order. The title should be brief and concise. Full names and addresses of the authors have to be given on the first page. The manuscript has to include a few key words, an abstract in English and a summary in German or French.

In the text, the hierarchy of subdivisions must be clearly apparent: headings in **bold face**, double- or single-spaced, as first words of paragraphs **bold** or double-spaced. Exact details on the origin, identification and deposition of the material investigated must be included. Herbaria have to be quoted according to the latest edition of the "Index Herbariorum". Scientific names should be in accordance with the international code of nomenclature. At least once in the manuscript the taxa should be given with their authorities. Manuscripts have to be submitted in triplicate. They should be typewritten, double-spaced with a broad margin and on one side of the paper only. The abstract, summary, key words, material and methods, collections examined, acknowledgement, references, figure legends, and tables will be printed in small letters. Literature citations in the text will appear in SMALL CAPITALS: SINGER (1964), KÜHNER & ROMAGNESI (1975), when more than two authors: SMITH & al. (1982).

Abbreviations and measurement units should be generally understood and conform to international usage. Non-Latin alphabets have to be transliterated following the rules of the ISO (International Standard Organization). Illustrations and tables should be submitted on separate sheets. They should be numbered in Arabic numerals. Printing area is 13 × 20 cm. Necessary reductions should be indicated. Line drawings should be neatly made in black ink on white or transparent paper. If ever possible, illustrations should be combined to a plate, using the entire print area. A scale has to be included in each illustration. Legends should be written on a separate page. Illustrations may also be submitted electronically: the minimum resolution required is 600 dots per inch. Some coloured illustrations will be published yearly. Additional colour plates can be included at the author's expense.

References at the end of the paper should be given in alphabetical order under the surnames of the authors. If several of an author's publications are referred to, these should be listed chronologically and publications from the same year marked by small letters (1992 a, b). References should conform to the following:

KORNERUP, A., WANSCHER, J. H., 1975: Taschenlexikon der Farben, 2. Aufl. – Zürich, Göttingen: Muster-Schmidt.

SINGER, R., 1977: Interesting and new species from Ecuador. – *Nova Hedwigia* **29**: 1-78.

BANDONI, R. J., 1981: Aquatic hyphomycetes from terrestrial litter. – In WICKLOW, D. T., CARROLL, G. C., (Eds.): *The fungal community. Its organization and role in the ecosystem*, pp. 693-708. – New York: Dekker.

Abbreviations should be in accordance with the *Botanico-Periodicum-Huntianum* (and Supplement).

Additionally to the hard copies of the manuscript, CDs or email attachments are welcome and shorten the time of computerization. The final version of your work is required, preferably in Microsoft Word.

Galley proofs will be sent to the author electronically or with ordinary mail. They should be checked and returned to the redaction within due course. For each paper 50 offprints and a pdf will be supplied free of charge. Additional copies at cost.

## Copyright

By submitting a manuscript, the authors agree that the copyright for their paper is transferred to the Austrian Mycological Society. All forms of reproduction of text, figures or tables out of this journal are prohibited without permission from the publisher.
